Equipment, materials, and supplies purchased with interest income become the property of the school corporation.

If an immediate threat to the public health necessitates pesticide application, the district shall give written notice as soon as possible.

The district may provide for training of school employees to become certified pest control applicators. The district may provide financial support for such training subject to budgetary constraints of the district.

6100 Local Wellness Policy

The MSD of Wabash County promotes healthy schools by supporting wellness, good nutrition, and physical activity as part of the total learning environment. The Superintendent shall develop Implementation Guidelines for this policy in accordance with applicable statutes and regulations.

Wellness:

As required by law, the Board of Education establishes the following wellness policy for the Metropolitan School District of Wabash County.

The Board recognizes that good nutrition and regular physical activity affect the health and well being of the Corporation's students. Furthermore, research suggests that there is a positive correlation between a student's health and well being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

A. Nutrition Education

1. Nutrition education shall be included in the Health curriculum and integrated into other subject areas of the curriculum so that instruction is sequential and standards- based and provides students with the knowledge, attitudes, and skills necessary to lead healthy lives.
2. Nutrition education shall include opportunities for appropriate student projects related to nutrition, involving, when possible, school staff, families, and community agencies and organizations.
3. Nutrition education posters, such as My Plate, will be displayed in the cafeteria.
4. The Corporation shall provide information to parents that is designed to encourage them to reinforce at home nutrition education being taught at school.
5. It will be the goal of MSD that students be offered healthy taste testing opportunities during the school day to familiarize students with new foods.
6. It will be the goal of MSD to promote student health across various curricular areas.

B. Physical Education

1. The sequential, comprehensive physical education curriculum shall provide students with opportunities to learn, practice and be assessed on developmentally appropriate knowledge, attitudes, and skills necessary to engage in lifelong, health-enhancing physical activity.
2. The K-12 program shall include instruction in physical education as well as opportunities to participate in competitive and non-competitive team sports to encourage lifelong physical activity.
3. Grades K-6 shall participate in physical education class at a minimum of once per week. Grades 7-8 shall participate in physical education class 1 semester per year and participate in health class one semester per year. Students in grades 9-12 shall participate in 2 semesters of physical education, one semester of health, and be offered elective PE.
4. All physical education teachers are licensed PE teachers and will be offered opportunities for continued training.
5. Planned instruction in physical education shall teach cooperation, fair play, and responsible participation.
6. Planned instruction in physical education shall meet the needs of all students, including those who are not athletically gifted.
7. Planned instruction in physical education shall be presented in an environment free of embarrassment, humiliation, shaming, taunting, or harassment of any kind.
8. Students shall not use regularly scheduled physical education class time to make up work in other subjects.

C. Physical Activity

1. Schools shall encourage families to provide physical activity outside the regular school day, such as outdoor play at home, participation in sports sponsored by community agencies or organizations, and in lifelong physical activities like bowling, swimming, or tennis.
2. The school shall encourage families and community organizations to institute programs that support physical activity of all sorts.
3. All students are encouraged to participate in extracurricular activities and intramural programs that emphasize the physical activity.
4. In addition to planned physical education, the school shall provide age-appropriate physical activities (e.g., recess during the school day, intramurals and clubs before and after school, and interscholastic sports) that meet the needs of all students, including males, females, students with disabilities, and students with special healthcare needs.
5. It will be the goal of MSD that the school shall discourage staff from withholding physical activity, such as recess, as a means of discipline.
6. It will be the goal of MSD that the staff shall be encouraged to incorporate physical activity breaks during class.

D. School-Based Activities

1. The schools shall schedule mealtimes so there is minimum disruption by bus schedules, recess, and other special programs, group meetings, or events.
2. The school shall provide attractive, clean environments in which the students eat.
3. The school shall allow students a minimum of 20 minutes to eat lunch daily.
4. The school shall make available free drinking water during meals as well as throughout the school day.
5. Students, parents, and other community members shall have access to, and be encouraged to use the school's outdoor physical activity facilities when not used for scheduled student activities.
6. The school staff shall be encouraged to participate in a wellness program.
7. Schools in the system utilize electronic identification and payment systems, therefore, eliminating any stigma or identification of students eligible to receive free and/or reduced meals.
8. Students are discouraged from sharing their foods or beverages with one another during meal times, given concerns about communicable diseases, allergies and other restrictions on some students' diets.
9. It will be the goal of MSD that the staff will integrate wellness activities across the school setting, not just in the cafeteria.

- D. The food service program will provide all students affordable access to the varied and nutritious foods they need to be healthy and to learn well.

6140 Review and Second Audit of Free and Reduced Lunch Applications

All schools should process Free and Reduced Lunch applications following the most current USDA and State rules and regulations. The employees processing the applications are to be trained and to understand the requirements of the program and the application process. More than one employee must be involved in the approval process of Free and Reduced Lunch applications. An additional employee should be reviewing the free and Reduced Lunch applications approval to verify the original approver is correctly and accurately processing the free and reduced applications.

Since Metropolitan School District of Wabash County exclusively uses a computer program for the Free and Reduced Lunch applications (without interference of an employee), a single audit will be performed of all Free and Reduced Lunch applications. The audit will be completed by a school employee.
